

WinFormGUI

General info

After downloading the file from the Internet, **FormGUI.resx** will contain a comment in the file to identify it as downloaded from the internet. For the **WinFormGUI** application to successfully build, the **FormGUI.resx** should be unblocked. This feature is called The Mark of the Web and was introduced by Microsoft to determine the origin of a file.

Unblocking

1. Right-click **FormGUI.resx** and go to **Properties**.
2. Click on the **Unblock** button or checkbox at the bottom of the dialog.
3. Click **OK** to save your changes
